

Floodlight

Floodlight | HS 5140

EAN 4007841575212

Functional description

Are you looking for a way to enter the world of sensor-switched floodlighting? Hugely popular, our answer is the HS 5140 halogen floodlight with its tilting and swivelling Fresnel lens. However, that doesn't mean we're resting on our laurels. To start with, we're adding the 400-watt ECO linear lamp. Incidentally, with a D-mount the floodlight can also be mounted in an upright position.

Technical specifications

Output	max. of 500 W/R7 linear halogen lamp
Detection angle	140° with sneak-by protection
Reach	12 m max. (temperature-stabilised)
Sensor tilting range	180 °
Sensor type	Passive infrared
Dimensions(w x h x d):	185 x 170 x 160 mm
Voltage	230-240 V/50 Hz
Capability of masking out individual segments	Yes
Time setting	8 sec. - 35 min.
Degree of protection (IP)	IP54
Protection class	I
Material	UV-resistant plastic and aluminium floodlight head
With lamp	Yes, 400 W ECO linear lamp
Version	Black
